

PROTECT TEXAS PREVENT WILDFIRES

Hunting season has begun and we all need to have an extra level of awareness and safety. Hunters should use caution in the field and be mindful of activities that may cause a wildfire.

Keep your campfires small and manageable. Large fires require more water and effort to ensure they are dead out. That's less hunting time!

Maintain off-road vehicles and avoid parking or idling over dry vegetation.

If towing a trailer, secure safety chains and ensure they will not come in contact with the road which creates sparks.

Always check with local officials for burn bans or other outdoor burning restrictions.
